Future Goals/Planning		
Get more proficient in Python along with learning all the core concepts that are being used in the development of "WhatsApp Bot" i.e how AWS works, local development, terraform and others. Start contributing into the main code repo as soon as possible.		
What all skills you've learnt in 1st Month and how much do you rate yourself?		
<p>In the span of this one month, for the first two weeks i was deployed as a MEAN stack trainee where i primarily spent a major chunk of my time brushing up my JavaScript and basic web development skills, where i feel i made a good progress and learnt a few new things as well. In the third week (on 16th July) i was asked start learning Python, basics of AWS, async programming, some python libraries. In the mean time i brushed up my version control (git) concepts as well.</p> <p>Javascript : (8/10) Postman : (8/10) Python : (7/10) RestAPIs : (7/10) Async Programming : (6/10) Understanding of AWS : (6/10) Git : (7/10) Plant UML : (6/10)</p>
